

Our History

Established nearly **two decades ago**, Sterling Fab Tech has distinguished itself by **representing** the most **cutting-edge manufacturing technologies** in the industry. Today, our corporate headquarters is centrally located in Dallas, Texas and we serve the Southwest Region, **from California to Louisiana**.

Our Approach

We understand that customers are bombarded by salesmen. Frankly, we don't want to be that guy. We pride ourselves in being the **subject matter experts** by maintaining the highest level of technical competency in **fabrication processes and machine technologies**. Combining this know-how with an engineering approach to sales, we want to understand your needs and **educate your team** so you can make the best possible decision without any sales puffery.

Our Solutions

Our Applications and Service teams offer pre-installation support, tool selection, software support and training, operator training, machine installations, machine repairs, and preventative maintenance. **They are also trained to support lasers, tube lasers, punching machines, and press brakes.**

Our Support

We have seen an increasing demand for both equipment and assistance, **every step of the way**. We have focused on how we can **make your life easier**. From time studies, ROIs, working with riggers, tooling selection, and start-up support. Therefore, we have heavily invested in our Dallas Technology Center, Applications Engineers, and Project Managers to assist you with these key steps.

Flat Sheet & Tube Laser Cutting

SFT offers TRUMPF laser cutting machines. TRUMPF is the largest manufacturer of laser technology worldwide and is widely known as the absolute leader in laser technologies.

	TruLaser 5030 w/ 24kW TruDisk	S18003
	TruLaser 1030 fiber	

Plate, Angle & Tube Bending

Faccin/Roundo/Boldrini/Transfluid offer the widest range of plate rolling machines from thin gauge material to the thickest plate. These include 2, 3, and 4 roll plate rolling machines that are tailor spec'd for your application.

		
4HEP-E Plate Roller	4HEP-E Plate Roller	R62X Angle Roller
S15045	S18012 S34015	S15045

Press Brakes

TRUMPF press brakes offer advanced automation options, the highest precision and angular accuracy, operator support, and tool variety.

	TruBend 7050	S18003
--	--------------	---------------

Robotic Welding

From robotic mig and laser welding cells that unskilled laborers can program in minutes, to industrial robots for structural welding, we have machines that will help you navigate your labor challenges.

	TruLaser Weld 1000	S18003
--	--------------------	---------------

Deburring, Slag Removal, & Leveling

Automated solutions for leveling, graining, and deburring thin gauge sheet metal up to hardened plate.

	
FlatMaster 55-165	EdgeBreaker 6000
EdgeBreaker 6000	S11023
S17007	

Punch and Laser/Punch Combo

TRUMPF TruPunch line provides flexibility in sheet metal processing. Combination Laser/Punch machines are also available and feature, single cutting head technology, nozzle changers, and laser sub axis for high-speed processing.

	TruMatic 3000 fiber	S18003
---	---------------------	---------------

Plasma, Oxy, & Machining Cutting Tables

Plasma cutting tables to suit your needs from small 5' x 10' unitized tables to heavy duty gantry machine up to 20' x 200' long, with our without machining capabilities.

		
K5200XMC	V310 Plate Processor	Platinum Cut
S18167	S24129	S11059

Structural Metal & Pipe Processing

SFT offers pipe, beam, & angle processing machines that range from simple saws to fully automated processing lines that will mark, cut, and drill.

		
V310 Plate Processor	BC25 Robotic Pipe Processor	AC/PC Processing Center
S24129	S11059	S34085

Waterjet

Precision cut metallic and non-metallic materials with low upfront costs using water jet tables from Flow.

	S13106
---	---------------

Quality

Quality inspection systems allow you to decrease inspection labor by 85% and quickly reverse-engineer flat and 3d parts.

	P150.35 w/ SurfScan & OptiScan (full 3d)
	P70.20 w/ SurfScan & AOI
	S17132

Laser Assist Gas

Generate on-demand Nitrogen to increase cutting quality and decrease costs.

	S11018
